PROJECTS

Planify App and Web (01/2023 - Present)
- Added many features in app like (Codepush, Sentry, OTP less etc.)
- Revamped app to new UI and improved performance.
- Created many componets in website and created Landing page and Login Flow.

AWS IoT Bingsu (09/2022 - 11/2022)
- Worked on react native app.
- Sending device sensors data to iot sitewise. (Accelerometer, Barometer, Orientation, Magnetometer, GPS location, Camera Stream and Network Details etc)
- Added kinesis video stream to stream live video from device to KVS dashboard.
- Added QR code scan feature.

Fintron Invest (05/2022 - 09/2022)
- Worked on react native app.
- Worked with UI library native base.
- Updated UI as per new modern UI designs.

TTD (The Trade Desk) (01/2022 - 04/2022)
- Working on react app.
- Learned how to work in a very big codebase.
- Following outstanding coding standards with very experienced devs.
- Get hands on experience with C#.

YARA (09/2020 - 12/2021)
- Worked on React-Native app for both ios and Android.
- Improved communication skills.
- Did few spikes on Alchemer, Zendesk, Auth0 and Kafka.
- Got to implement a few APIs which helped me to understand the backend flow.
- Nominated for best work few times.
- Created a dynamic admin page to approve, decline and update user registration. (Highlight: It was all based on config which was capable to handle many countries and languages).
- Wrote unit test cases in jest.
- Added OTP autofill for android and suggestion for ios.
